DOCTOR'S ORDERS
FOR PATIENTS WHO HAVE RECEIVED
PHOSPHORUS-32 RADIONUCLIDE THERAPY

Patient received __________ mCi of P-32 by (route) __________________________
at ______________ a.m./p.m. on ______________________________, 20__________.

Radiation precautions are necessary during the first 48 hours of therapy. Radiation precautions include inspection of
dressings and linens for evidence of leakage. If there is no evidence of leakage, then all dressings and linens are handled
routinely. If there is leakage, then the UCDHS Radiation Safety Officer must be notified; phone numbers are listed
below. Medical personnel are requested to use plastic gloves in handling all dressings and linen and to store these items
in a disposable bag labeled "CAUTION - RADIOACTIVE MATERIAL." The UCDHS Radiation Safety Officer
must also be notified if a repeat paracentesis or thoracocentesis is required within 48 hours of treatment or if an open
surgical procedure or death occurs with 60 days of treatment.
